

## The Story of the Titanic

The Titanic was a big, beautiful ship that sailed across the ocean. It was like a floating palace! It had many rooms, fancy dining areas, and even a swimming pool. People thought it was the safest ship ever made.

The Titanic left the port in England on April 10, 1912. Many passengers were excited to travel to America. They dreamed of a new life and fun adventures. The ship was full of families, workers, and rich people. Everyone was ready for a wonderful trip!

But on April 14, the Titanic hit an iceberg. An iceberg is a huge piece of ice that floats in the water. The ship started to sink. People were scared and confused. They had to get into lifeboats to escape. There were not enough lifeboats for everyone, which made it very hard.

The Titanic sank into the cold ocean. Many people were lost, but some were saved by other ships that came to help. It was a sad day for everyone who loved the Titanic.

Today, we remember the Titanic story. It helps us learn about safety on ships. The Titanic teaches us to always be careful and prepared, even when we think we are safe.
