

What Happens in the Springtime?

The days get longer.

The days get warmer.

The rain falls.

The trees grow leaves.

The trees grow flowers.

The grass grows.

The flowers grow.

What Happens in the Springtime?

The days get longer.

The sun shines.

The weather gets warmer.

Lots of rain falls.

The rain waters the plants.

The trees grow leaves.

The trees grow flowers.

The grass grows.

The flowers grow.

What Happens in the Springtime?

The days get longer.
There is more sunshine.
The sun warms the air.
The weather gets warmer.

By Karana Lacasse via Wikimedia Commons

In many places, lots of rain
falls in the spring.
It waters the plants and
trees.

First the trees grow leaves
and then flowers.

The grass grows.
Flowers grow on the ground.
Other plants begin to grow.
The sun and rain help
them grow.
